Quick Connect Ejector Rods

Fast, Simple and Easy-to-Use!

- Dramatic Reduction in Change Time
- No Tools or Effort Required
Quick Connect Ejector Rod

Model PME

The ejector rod has been divided into a base rod and an attachment rod for speed, simplicity and ease-of-use when changing ejector patterns. No tools are required, allowing changes in mere seconds.

Features

- **Easy-to-Use**
  Divided ejector rods result in arranging ejector patterns only by pulling out and pushing in attachment rods, allowing changes in mere seconds.

- **No Tools Required**
  No tools are required when changing ejector patterns.

- **Light and Safe**
  Changing only the attachment rod is a light and safe operation.

- **Highly Reliable**
  The simple mechanical structure makes for a long operating life and high reliability.
Exchange Procedure

Pull out and push in to exchange ejector rods!!

① Move the ejector plate fully forward.

② Pull out the attachment rods manually.

③ Arrange them in the new pattern.

④ Ejector rod pattern change in seconds. ※1

※1. Changing time depends on the machine size, rod length and working environment, etc.

1. **Rod Diameter**
   - 25 : φ25mm
   - 30 : φ30mm
   - 45 : φ45mm
   - Please contact us for any other rod diameters not listed above.

2. **Rod Component**
   - A : Attachment rod (Removable)
   - B : Base rod (Fixed)

3. **Design No.**
   - 0 : Revision Number of Product

4. **Rod Length**
   - Attachment Rod Length (Ejector Stroke)
     (Total Attachment Rod Length = Ejector Stroke + 5)
   - Base Rod Length (Total Ejector Rod Length - Ejector Stroke)
     (Total Ejector Rod Length = Base Rod Length - 5)
   - Notes:
     1. Please indicate dimensions in mm.
     2. Please specify the rod length, considering the offset dimensions to prevent the rod from overhanging.
        Recommended offset dimension is 5mm.
     3. When using a magnet clamp or insulation board, please check the board thickness dimension and specify the rod length.

5. **Thread Type (Base Rod Only)**
   - P : Male Thread
   - For female threading, please contact us.

6. **Mounting Thread (Base Rod Only)**
   - Example: M24 = M24 Coarse Thread
   - Please specify it by metric coarse screw thread.

7. **Mounting Thread Length (Base Rod Only)**
   - Example: 20 = Bolt Length is 20mm
## External Dimensions

**Notes:**

1. The rod can be manufactured to the customer’s specifications. Please specify the model no.
2. Please specify the rod length including the offset amount considering the machine specifications and application.
3. Please contact us for more specific dimensions of individual orders.
Quick connect ejector rod

Cautions

● Notes on Design

1) Check Specifications
   ● Please use each product according to the specifications.

2) Please make sure that there are no foreign substances on the fitting side when connecting.
   ● If there is a possibility that foreign substances adhere to the fitting side of each end, please eliminate them with air blowing.
   Otherwise, it may cause connection error due to the existence of foreign substances.

3) Please avoid using in the situation that rods may be affected by eccentric load.
   ● Buckling is caused by eccentric load.
   Rods can be broken by eccentric load.

4) Inclined ejector plate or deformation of ejector rod mounting bolt holes cause malfunction due to the interaction between ejector rods and ejector holes of the board.

● Maintenance and Inspection

1) Component Removal
   ● Before components are removed, make sure surrounding items are secure in place.
   Make sure there is no abnormality in the respective parts before restarting the machine or equipment.

2) When it is difficult to pull out the attachment rod.
   ● When the joint part is sticking due to foreign substances, take them out by putting a stick into the through hole in the side of the attachment rod.

3) Regularly tighten base rods to ensure proper use.

4) The products should be stored in a cool and dark place without direct sunshine and moisture.

5) Please contact us for overhaul and repair.

● Installation Notes

1) Mounting / Removing
   ● When mounting / removing, tighten the base rod with a hexagonal wrench using the key inside base rod diameter.
   When tightening, make sure not to scratch the joint part.
   (You can also tighten the base rod with a spanner from the outside of the base rod.)
   Torque values for the mounting screw are shown in the table below.

● Warranty

1) Warranty Period
   ● The product warranty period is 18 months from shipment from our factory or 12 months from initial use, whichever is earlier.

2) Warranty Scope
   ● If the product is damaged or malfunctions during the warranty period due to faulty design, materials or workmanship, we will replace or repair the defective part at our expense.
   Defects or failures caused by the following are not covered.
   ① If the stipulated maintenance and inspection are not carried out.
   ② If the product is used while it is not suitable for use based on the operator’s judgement, resulting in defect.
   ③ If it is used or handled in an inappropriate way by the operator.
      (Including damage caused by the misconduct of the third party.)
   ④ If the defect is caused by reasons other than our responsibility.
   ⑤ If repair or modifications are carried out by anyone other than Kosmek, or without approval and confirmation, it will void warranty.
   ⑥ Other caused by natural disasters or calamities not attributable to our company.
   ⑦ Parts or replacement expenses due to parts consumption and deterioration.
      (Such as rubber, plastic, seal material and some electric components.)
   Damages to other equipment resulting from product defects are excluded from the warranty.

● Notes on Handling

1) Do not handle or remove the machine unless the safety is ensured.
   ① The machine and equipment can only be inspected or prepared when it is confirmed that the preventive devices are in place.
   ② Before the machine is removed, make sure that the above-mentioned safety measures are in place.
   ③ After stopping the machine, do not remove until the temperature cools down.
   ④ Make sure there is no abnormality in the respective parts before restarting the machine or equipment.

2) Do not disassemble or modify it.
   ● If the equipment is taken apart or modified the warranty will be void, even within the warranty period.
**Specification Sheet**

If you already have ejector rods and think of replacing them with ours, please put the ejector rod dimensions in the blank below and fax it your nearest sales office.

★2. This blank is only for the customer using ○ type rods.
Installation of the Base Rods

No Special Tools Required!

1. Align the base rod with the bolt hole in the ejector plate.

2. The base rod can be tightened using a hex key. (A wrench can also be used to tighten the rod.)
