

Dear Customers

Kosmek Ltd.

Announcement of Sales Launching of Double Acting Link Clamp (Model LKA)

To Whom It May Concern, wish you all the best in your business.

Thank you very much for all the support to us.

We hereby announce to start sales of new-type double acting link clamp (model **LKA**) which features higher cylinder force, more compact design and more functionality in order to meet the customer's demand.

The former model **LQ/LK** which has gotten your favor over the years will be replaced by the new model **LKA** for sales.

Thanks for your understanding if you could consider the new model **LKA** in the future.

Nevertheless, if the former model **LQ/LK** is necessary in the case of spare parts or emergency due to malfunctioning, please contact our sales persons.

It will be much appreciated if you order our new **LKA** double acting link clamp.

Best regards

Notes

1. On specification compatibility

They are compatible in terms of Stroke and Used Hydraulic Range.

The body material is changed from aluminum alloy to forged steel.

The clamping capacity is increased for all sized products (maximum 36% up).

* Refer to the catalogue for the details of specifications.

2. On compatibility with regard to dimensions and installation

They are compatible in terms of Hydraulic Pipeline, Mounting Bolt Size/Pitch, Flange Projection Dimensions Viewed from the Top, and Lever Dimensions.

All products are shorter in size at the flange height direction under the flange.

* Refer to the catalogue for the details of specifications.

3. On Options

The high strength link plate type (-H) is added in order to handle the bigger eccentricity.

* Refer to the catalogue for the details of specifications.

4. Replacement time

The sales of the new type for replacement start from October 30 2008.

For details or unclear points, please refer to our catalogue, website (<http://www.kosmek.co.jp>), or contact our sales persons.

Thanks
